- JWT Auth
- MongoDB

Currently working on [Social Media App](#) and Learning advanced concepts of MERN Stack as well. All of my projects are available at github.com/anasraza07

Projects

Social Media App (MERN Stack)

Project-Link: [Social-Media-App](#)

Developed a dynamic Social Media App using the MERN stack, enabling users to effortlessly Log in, Create, Edit, and Delete posts with headings. Executed full CRUD operations seamlessly. Currently enhancing user engagement with an upcoming Chat feature. My Social Media App represents my expertise in building interactive and user-friendly applications.

Movie Recommendation App

Project-Link: [Movie-Recommendation-App](#)

Crafted a Movie Recommendation App using HTML, CSS, and JavaScript as part of a JS crash course assignment. The application boasts a pixel-perfect design, meeting the assignment requirements seamlessly. Key features include user-friendly filters for genre, language, and release year, providing detailed movie information. Achievements include achieving a pixel-perfect design and prioritizing a responsive, user-friendly experience. This project showcased and enhanced my web development skills.

Budget-App

Project-Link: [Budget-App](#)

Experience financial empowerment with my Budget Management App. Set your budget, effortlessly track, edit, and delete expenses, and gain insights through a user-friendly dashboard. Built with HTML, CSS, and JavaScript, this app puts you in control of your finances.
